vision trimline

2021 - 2022 EDITION

WELCOME.

The ability to control fire was a dramatic change in the development of humanity. Among many things it provided warmth, light and security. We believe this base connection still exists and is the reason why we still desire to use the fireplace as the central focal point of our living space.

The Vision Trimline range has been designed with the specific purpose of recreating that instinctive connectivity with nature.

Our innovative fires are skilfully engineered to allow a true trimless aspect with no distracting frames or visible workings, just fire. These highly efficient beautifully designed appliances are available in a variety of different sizes and can be positioned in virtually any part of your home.

TRIMLESS.

Our Trimless fires are designed to be positioned beautifully into integrated walls or retrofitted into existing chimneys. These highly efficient innovative gas fires are skilfully engineered allowing a truly trimless aspect. This means no distracting frames or visible mechanical workings, just fire.

With a choice of either landscape or portrait versions there is an option to suit all interiors. Meticulous attention has been paid to the fuel bed and flame patterns to ensure a perfect recreation of a natural, living fire, with large glass panes to allow unrestricted views.

TL38 TRIMLESS.

The TL38 Trimless balanced flue fire is one of the smaller appliances within the range, making even the smallest rooms feel cosy and inviting. It creates a luxury ambience with a single press of a button. With its realistic fuel bed and flame pattern, it makes a perfect choice for smaller properties.

DISCOVER THE POSSIBILITIES WITH THE TL70SL.

With an innovative, versatile design the compact TL70sl is easy to install and simple to service. The TL70SL can be wall mounted and installed directly to any internal outside facing wall.

One of the biggest advantages is that there is minimal building work required and with an output of 3.8kW and an impressive efficiency rating of B, the TL70sl will fit perfectly with virtually all interiors with sleek lines for a contemporary living statement.

The TL70sl utilises the same features as the other appliances within the range. The TL70 is remotely operated and to alleviate the need for batteries a mains adaptor is supplied as standard.

TL70SL.

With an innovative, versatile design the compact TL70SL is easy to install & simple to service. It can be wall-mounted & installed directly to any internal outside-facing wall.

TL70SL WITH INTEGRATED HEAT BOX.

When the TL7SL is installed with our new bespoke Integrated Heat Box (IHB) it allows you to construct the installation from combustible materials making the fire a versatile choice in most modern building applications.

The use of the integrated heat box allows the appliance to be installed in situations where combustible surfaces or materials would or may hinder the installation given the risk of heat and allows quicker access for service and maintenance.

- Easy to install & simple to service
- Can be fitted with the use of combustible materials* when installing with the Integrated Heat Box
- Slimline appliance only 155mm depth
- Can be wall mounted or installed within a suite
- Can be installed directly to any internal outside facing wall
- Energy class B – 84% efficient
- Can be installed into a cavity wall
- Realistic log effect
- Comes complete with mains adaptor

*Please refer to installation instructions when fitting with or without the IHB

UNIQUE STYLING.

Vision Trimline fires offer a sense of true minimalist beauty. However, if your home style dictates, there can sometimes be a requirement for a little more flare, even extravagance!

To address this, we have created an option to combine any standard* mantel with the TL73H and TL63 giving you more choice to create your very own unique fireplace.

There are no limits to your creativity with the TL73H and TL63 option, we have put together a collection of ideas on pages 104 to 107 for inspiration.

*Ask your approved stockists for details

CONVENTIONAL THINKING.

If your home does feature a conventional brick chimney and you wish to utilise this, then we have that covered with our TL60CF appliance. Like our balanced flued appliances, the TL60CF can be fitted trimless, with the classically styled Woodbury fireplace suite, or with a variety of mantels to create a truly unique focal point to your living space.

TL60CF TRIMLESS

If your home features a conventional brick chimney and you wish to utilise this, then we have that covered with our TL60CF appliance. TECHNOLOGY.

EVERYTHING YOU NEED IN ONE PACKAGE

Ecomax remote control - this sleek designed handset features a thermostatic control countdown timer to automatically turn off the fire, and an Ecomax button, allowing adjustment of the flames to regulate room temperature resulting in a 40% energy saving.
Adjustable legs - allowing you to easily install the fire at your desired height without the need for further, unnecessary building work.
Control access door - a neat, gloss finish, access system to allow access to the manual fire controls.
Convection vents - two of these are supplied with each fire to allow convected hot air from the chimney into your room.

DOUBLE BURNER (DB) FEATURE

With the exception of the TL38, TL46, TL60CF AND TL63C/P models, all other Vision Trimline fires are equipped with an innovative double burner system. This clever feature staggers the flame pattern in two rows and gives an extra sense of depth and realism whilst offering a more economical way to use your fire. At the touch of a button the front burner row remains active whilst the rear burner row diminishes, giving unparalleled visual effect with a reduction of 40% of the heat output. Used in combination with the Ecomax remote control can result in the benefit of reduced running costs of up to 60%.

GO Wi-Fi FOR MAXIMUM CONTROL

Introducing the latest optional upgrade option for Vision Trimline fires, the Myfire app uses wireless technology that connects the fire to your home Wi-Fi network. You can now take control using your smartphone or tablet with features such as:

- Temperature adjustment and thermostatic control
- Flame pattern adjustment and animated wave profiles
- Individual user profiles
- Countdown timer
- Weekly programming

ANTI-REFLECTIVE GLASS

Anti-reflective glass (ARG) which is available on many Vision Trimline models is a premium feature that allows you to maximise your experience of the beautiful flames giving the appearance of an open fire whilst having the convenience of a gas appliance. This clever feature gives the illusion that there is no glass between the fire and you, creating an even more authentic experience.

BURNING LOGS TECHNOLOGY

TL63, TL83, Tourmaline and Zircon models incorporate the latest burning logs technology to recreate the most authentic, realistic looking flame ever. Combined with high definition, ultra realistic ceramic logs, this innovate feature creates a fire so realistic it cannot be distinguished from a natural, living fire. For the ultimate in warm ambiance, the optional LED glowing fuel bed creates a subtle, relaxing impression of gently burning embers.

INTERIOR STYLING & FUELBED OPTIONS.

For that extra WOW factor, why not choose to upgrade to a black mirrored glass lining for your fire chamber and add a reflection to the fuel bed and flames to give a remarkable effect of added depth and detail. If burning logs is not the look you are going for, then perhaps you would be more interested in an alternative fuel bed for your fire. The collection features a range of stunning options to choose from.

TL70SL UPGRADE OPTIONS.

For that extra WOW factor, there is also an option to upgrade to a black glass lining within the combustion chamber which offers a remarkable effect of added depth and detail. Other available upgrades also include Wi-Fi, vermiculite interior lining and alternative frame options.

BLACK GLASS **UPGRADE.**

VERMICULITE BRICKS **UPGRADE.**

FLUE SYSTEMS.

All Vision Trimline fires (excluding the TL60CF) use a specialised double wall concentric flue system. The THC-CC system is an obligatory and integral part of the complete combustion system and must be used when installing the fire. THC-CC is made of high quality 0.5mm thick stainless steel AISI 316 inner and AISI 304 outer-liner.

A wide range of flue/chimney components allows for easy installation when terminating through the wall or the roof in an existing chimney or a dedicated fabrication. Please consult your nearest dealer for more details.The THC-CC system is approved according to CE in combination with all Vision Trimline balanced flue gas fires.

New to the Vision Trimline range is the DECO concentric flue system. Elegant connecting pipes with no visible locking bands available in black coated stainless steel. Both the design and ease of installation are of a very high standard. The connection of the various sections and elements is carried out by means of a click connection with the cam spring. Turn the flue to the correct position and when you hear the “click” it is already securely attached. It has never been so easy to quickly install a beautiful connecting pipe!

The DECO system is the first and only system that works with this unique click connection and is made of high-quality stainless steel material and is resistant to high temperatures and flue gases.

UNIQUE **BURNING** LOGS TECHNOLOGY.

Available as standard on all TL63, TL83, Tourmaline and Zircon fires, including trimless, corner and panoramic models.
